## LIFTMASTER® INTRODUCES ITS NEW LINE OF UL 325 LISTED GATE OPERATORS

*New Best-In-Class Features Deliver Unsurpassed Safety and Performance*

**Elmhurst, IL, November 4, 2015** — LiftMaster, the nation's leading manufacturer of residential and commercial gate operators, is pleased to introduce its new line of UL 325 Listed Gate Operators and Monitored Safety Entrapment Protection Devices, engineered and tested to work as a UL 325 compliant system.

By engineering these new gate operators and monitored entrapment protection devices to work together as a 2016 UL 325 compliant system, LiftMaster Dealers and professional installers can continue to provide their customers with products that are built to deliver the highest standards of safety and performance, and provide peace of mind for every gate application.

The redesigned AC and DC gate operators deliver best-in-class features which include unparalleled connectivity with LiftMaster's patented MyQ® technology so your customers can securely monitor the gate from anywhere via a mobile device, a Security+ 2.0®, 3-Channel Radio Receiver which virtually eliminates interference and extends range, and P3 Motors® which are purpose-built and designed to meet exact requirements. Additionally, the new line of DC gate operators feature industry leading Battery Backup performance, so you're never down when the powers out and best-in-class Solar Power Management—providing efficient power in the remotest locations.

The installation of the operators has also been simplified. A Common Control Board Platform and User Interface with additional monitored safety inputs makes installations easier and more intuitive. The products' Wireless Dual-Gate Communication eliminates trenching and expensive conduit costs.

"The product has been in development and has been rigorously tested for years in anticipation of the new UL 325 Standard," said Scott Blue, Director of Marketing, Perimeter Access Solutions. "We are committed to providing the industry with product that is not only designed to

provide best-in-class performance but also meet the stringent UL 325 2016 Safety Standard. Additionally, we strive to provide help and understanding of the new standard and assistance with installations.”

The new family of LiftMaster UL 325 Listed Gate Operators include the LA400 Residential DC Linear Actuator, LA412 Solar Residential DC Linear Actuator, LA500 Residential / Light Commercial DC Linear Actuator, RSL12U Residential / Light Commercial DC Slide Gate Operator, RSW12U Residential / Light Commercial DC Swing Gate Operator, CSW24U Commercial Swing Gate Operator, CSL24U Commercial High Traffic DC Side Gate Operator, CSW200 Commercial Swing Gate Operator, SL3000 Commercial Slide Gate Operator, SL585 Industrial Slide Gate Operator and the SL595 Heavy-Duty Industrial Slide Gate Operator.

The accompanying LiftMaster UL 325 Listed Safety Monitored Entrapment Protection Devices include the LMRRU Monitored Retro Reflective, LMTBU Monitored Through Beam and the LMWEKITU Wireless Edge Kit System. These devices are NEMA 4X rated to withstand the harshest environments and protect against the elements.
