

## **LiftMaster's CAPXL Leads the Way for The Next Generation of Access Control**

*The new Connected Access Portal, High Capacity (CAPXL) with LiftMaster Cloud™ provides residential community managers with a remotely accessible, reliable and secure access control system.*

**OAK BROOK, Ill., January 3, 2018** — [LiftMaster®](#), the number one brand of professionally installed access control solutions, today introduces the Connected Access Portal, High Capacity (CAPXL) with LiftMaster Cloud™. This all-new access control system gives residential community managers a smart, cloud-based solution to control up to four gates or doors and manage multiple communities from a single dashboard, all with an appealing modern appearance and unmatched performance.

Designed to save community managers time while helping to attract and retain residents, the CAPXL with LiftMaster Cloud offers unparalleled control, security and reliability. With remote programming and activity monitoring using LiftMaster Cloud™, community managers can login to the website to track and control community access points and create alerts when an entry code is being overused or a suspended user is trying to gain access. The CAPXL with LiftMaster Cloud also features an intuitive interface with a high-definition color touch display and customizable backgrounds for superior resident and guest satisfaction.

The CAPXL with LiftMaster Cloud reduces downtime with customizable email notifications, letting community managers and dealers know if there's a problem. Local database storage also allows residents to enter even if the internet is down. For maximum durability, the CAPXL with LiftMaster Cloud features a stainless steel frame designed to withstand both weather and heavy use. All these features, combined with crystal-clear call quality and no resident long-distance charges, make the CAPXL with LiftMaster Cloud the most advanced and easy-to-use internet-based solution for community managers.

"LiftMaster is leading the way in helping community managers convert from analog telephone entry to cloud-based access systems," said Jackie Lorenty, Vice President and General Manager, Perimeter Access Solutions, LiftMaster. "The CAPXL provides community managers

with the most sophisticated and easy-to-use tool to control their community across a number of entry points – all via the LiftMaster Cloud.”

Community managers can expand their access control system with a variety of powerful add-ons like the Connected Access Portal, 2-Door Controller (CAP2D) which allows community managers to control other doors and gate entry points throughout the property with the LiftMaster Cloud. Additional remote controls, proximity readers, vehicle loop detectors, and elevator controls are also available.

The CAPXL with LiftMaster Cloud is compatible with LiftMaster’s full line of gate operators, [access control products](#) and software, allowing for seamless solutions designed to meet the requirements of any property.
